

Health & Welfare Reflection

Think about the reporting requirements in your state.

Tip:

Ask your supervisor if you have any questions.

- 1. What critical events must be reported in your state and what regulations and/or policies govern this reporting?**
- 2. Who are mandatory reporters?**
- 3. What is the process for reporting events: what must be reported, when, and to whom?**
- 4. Is there a separate process for reporting instances of suspected abuse, neglect and exploitation?**
- 5. How can you use the service planning process to help prevent future instances of abuse, neglect or exploitation?**
